## PROFESSIONAL SUMMARY

Software Developer and Computer & Software Engineer with hands-on experience in data science, algorithmic optimization, and production-grade software development. Specialized in data processing, quality, and modeling with Python, R, and SQL, high-performance computing acceleration via C++17 and RcppArmadillo ($> 120\times$), and multiplatform engineering with Kotlin Multiplatform, Go, and PostgreSQL. Continuously advancing professional analytical skills backed by Google and Microsoft Power BI certifications.

## PROFESSIONAL EXPERIENCE

**Nissi Advisor S.P.A** Temuco, Chile (Remote)
*Software Engineer* May 2026 – Present

- Lead multiplatform mobile solution (KMP, Compose Multiplatform, Material 3) across Android and iOS with over 85% shared code.
- Engineered reactive consumption of Go RESTful microservices via Ktor Client, PostgreSQL optimizations, and Borg athletic exertion analytics.
- Implemented robust multiplatform authentication with Google Sign-In (Credential Manager API), automatic JWT rotation, and encrypted storage.

**Punto Com** Temuco, Chile
*IT Support Specialist* March 2025 – March 2026

- Executed comprehensive technical diagnostics, preventive/corrective maintenance, and system recovery across enterprise devices, minimizing downtime.
- Managed resolution of complex technical incidents for external enterprise clients, ensuring strict SLA compliance.
- Designed an inventory and case traceability system leveraging relational database models in advanced Excel, optimizing stock accuracy and technical reporting.

**Universidad Católica de Temuco** Temuco, Chile
*Data Scientist (Professional Internship & Thesis)* August 2024 – January 2025
*Project:* Algorithmic optimization of the statistical package **mutualinf** in R (github.com/RafaelFuentealbaC/mutualinf)

- Redesigned the statistical core to C++17 and RcppArmadillo, reducing runtime from 120+ s to under 1 s ($> 120\times$ speedup) on multidimensional queries.
- Implemented hash tables (`std::unordered_map`) with tailored Fibonacci Hashing dispersion ($\mathcal{O}(1)$), eliminating hash collisions.
- Refactored matrix routines eliminating recursive overhead and verified mathematical consistency via `microbenchmark` for CRAN release.

**Universidad Católica de Temuco** Temuco, Chile
*Data Scientist (Research Project / Pre-Thesis)* August 2023 – January 2024
*Project:* Cluster Parallelization and Scalability of **mutualinf**

- Designed and executed scalability benchmarks on a 68-core HPC cluster under OpenSUSE and local environments (Ubuntu / Windows 11), analyzing CPU and RAM usage.
- Developed Windows parallel cluster concurrency (`makePSOCKcluster`, `parLapply`) for compute-intensive statistical workloads.
- Designed the `mutual_inv` function with reduced computational overhead and engineered adaptive CPU thread-detection safeguards.

**Universidad Católica de Temuco** Temuco, Chile
*Data Scientist (Initial Internship)* December 2022 – January 2023

- Ingested, cleaned, and structured nationwide school segregation datasets in Chile using R and Excel data pipelines.
- Designed and evaluated early multi-threaded concurrency prototypes in native C++ with `<thread>` and `Rcpp` bindings.
- Configured scientific compilation pipelines with RTools, MSYS2, g++, and MiKTeX for automated testing and documentation.

## EDUCATION

**Universidad Católica de Temuco** Temuco, Chile
*B.S. in Computer & Software Engineering (Information Technology Minor)* 2020 – 2025

## CERTIFICATIONS & PROFESSIONAL TRAINING

- **Google Data Analytics Professional Certificate** | Google – Coursera October 2026
- **Google AI Essentials Specialization** | Google – Coursera August 2026
- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** | Microsoft 2025 – 2027
- **General English Program (A2 Level in progress)** | Wall Street English 2025 – Present
- **Workshop: Fundamentals of Accelerated Computing with CUDA C/C++** | NVIDIA DLI April 2024

## TECHNICAL SKILLS

- **Programming Languages:** Python, R, C++ (C++17, CUDA), SQL, Kotlin, Go, DAX.
- **Data Science & Machine Learning:** pandas, NumPy, SciPy, Scikit-Learn, OpenCV (cv2), Matplotlib, Seaborn, ggplot2, tidymodels, dplyr, data.table, Rcpp, RcppArmadillo, parLapply, future_lapply, Jupyter Notebook.
- **Business Intelligence & Cloud:** Microsoft Power BI, Microsoft Fabric, Tableau, AWS, Azure, Google Cloud Platform (GCP), Excel.
- **Software Engineering & DevOps:** Docker, Git, GitHub, Linux, MongoDB, Kotlin Multiplatform (KMP), Compose Multiplatform, Flask, React, Next.js, Scrum.
- **Languages:** Spanish (Native), English (A2 – Elementary / Ongoing at Wall Street English).
