PROFESSIONAL SUMMARY

Software & Computer Engineer specialized in Data Science and Software Engineering. Proven experience in low-level algorithmic optimization with over 120× speedup using C++17 and RcppArmadillo, production-grade multiplatform software development with KMP, Go, and PostgreSQL, and data analytics certified in Google Data Analytics and Microsoft Power BI. Strong foundation in advanced data structures, parallel computing, and scalable pipelines.

PROFESSIONAL EXPERIENCE

Nissi Advisor S.P.A — Temuco, Chile (Remote)
Software Engineer — May 2026 – Present

- Lead multiplatform mobile solution (KMP, Compose Multiplatform, Material 3) across Android and iOS with over 85% shared code.
- Engineered reactive consumption of Go RESTful microservices via Ktor Client, PostgreSQL optimizations, and Borg athletic exertion analytics.
- Implemented secure authentication with Google Sign-In (Credential Manager API), automatic JWT rotation, and encrypted keychain storage.

Punto Com — Temuco, Chile
IT Support Specialist — March 2025 – March 2026

- Executed technical diagnostics and preventive/corrective maintenance for corporate and mobile devices, minimizing system downtime.
- Managed resolution of complex technical incidents for external enterprises, ensuring strict SLA compliance.
- Designed an inventory and case traceability system leveraging relational database models in Excel, optimizing stock accuracy and technical reporting.

Universidad Católica de Temuco — Temuco, Chile
Data Scientist (mutualinf Project) — 2022 – 2024 (1 cumulative year / 3 stages)

- **Phase III · C++ Optimization (Aug 2024 – Nov 2024):** Redesigned the statistical computing core in C++17 and RcppArmadillo, reducing runtime from 120+ s to under 1 s ($> 120\times$) using hash tables (`std::unordered_map`) and $\mathcal{O}(1)$ Fibonacci Hashing for CRAN release.
- **Phase II · Cluster Parallelization (Aug 2023 – Jan 2024):** Developed Windows multi-core cluster support (`makePSOCKcluster`, `parLapply`) for advanced queries, built the `mutual_inv` function, and enforced CPU thread limits.
- **Phase I · Modeling & Prototyping (Dec 2022 – Jan 2023):** Processed nationwide school segregation datasets in Chile using R and Excel, and evaluated initial multi-threaded concurrency prototypes in C++ with `<thread>` and Rcpp.

EDUCATION

Universidad Católica de Temuco — Temuco, Chile
B.S. in Computer & Software Engineering (Information Technology Minor) — 2020 – 2025

CERTIFICATIONS & PROFESSIONAL TRAINING

- **Google Data Analytics Professional Certificate** | Google – Coursera — October 2026
- **Google AI Essentials Specialization** | Google – Coursera — August 2026
- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** | Microsoft — 2025 – 2027
- **General English Program (A2 Level in progress)** | Wall Street English — 2025 – Present
- **Workshop: Fundamentals of Accelerated Computing with CUDA C/C++** | NVIDIA Deep Learning Institute — April 2024

TECHNICAL SKILLS

- **Languages:** Python, R, C++ (C++17, CUDA), SQL (PostgreSQL), Kotlin, Go, DAX.
- **Data Science & ML:** pandas, NumPy, SciPy, Scikit-Learn, OpenCV (cv2), Matplotlib, ggplot2, tidymodels, dplyr, data.table, Rcpp, RcppArmadillo, parLapply, future_lapply, Fibonacci Hashing, Jupyter Notebook.
- **Business Intelligence & Cloud:** Power BI, Microsoft Fabric, Tableau, Azure, Google Cloud Platform (GCP), Excel.
- **Software Engineering & Tools:** Docker, Git, GitHub, Linux, MongoDB, Kotlin Multiplatform (KMP), Compose Multiplatform, Flask, React, Next.js, Scrum.
- **Languages (Spoken):** Spanish (Native), English (A2 – Elementary / Ongoing at Wall Street English).
